Azure Functions

Azure Functions

ML.Net

ML.NET

Machine Learning framework made for .NET developers

Build-your-own

Build your own custom models by writing C# or F# code

Developer focused

ML.NET provides just the right amount of productivity and control

Extensible

Tap into other machine learning toolkits with the rich extensibility model like TensorFlow

Proven

ML.NET has been used internally in products like Office and Bing for years

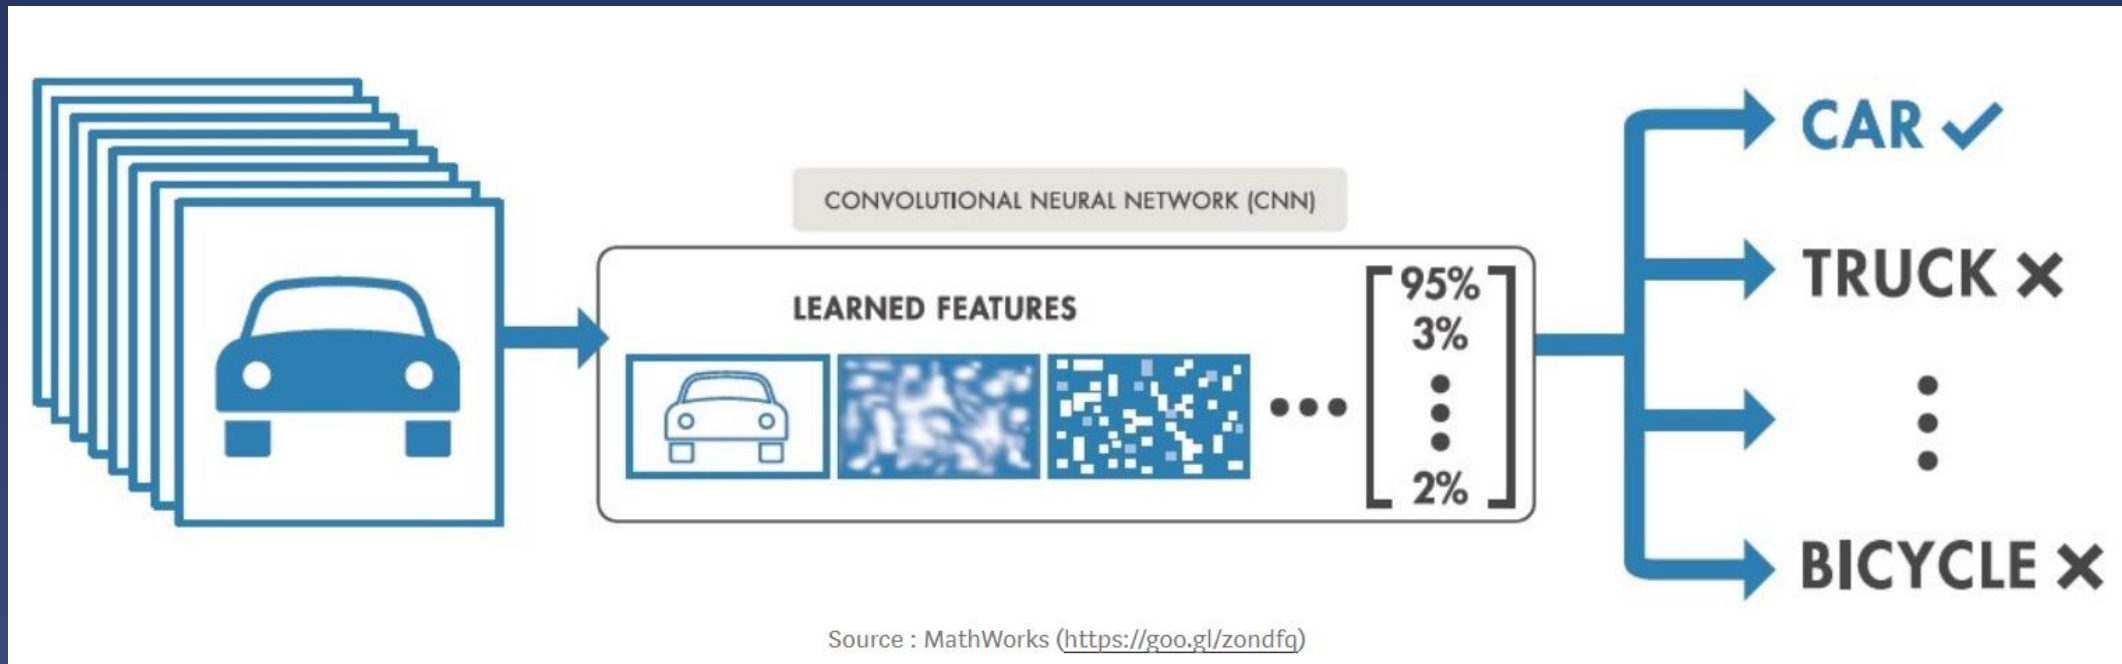

Open source and Cross-platform

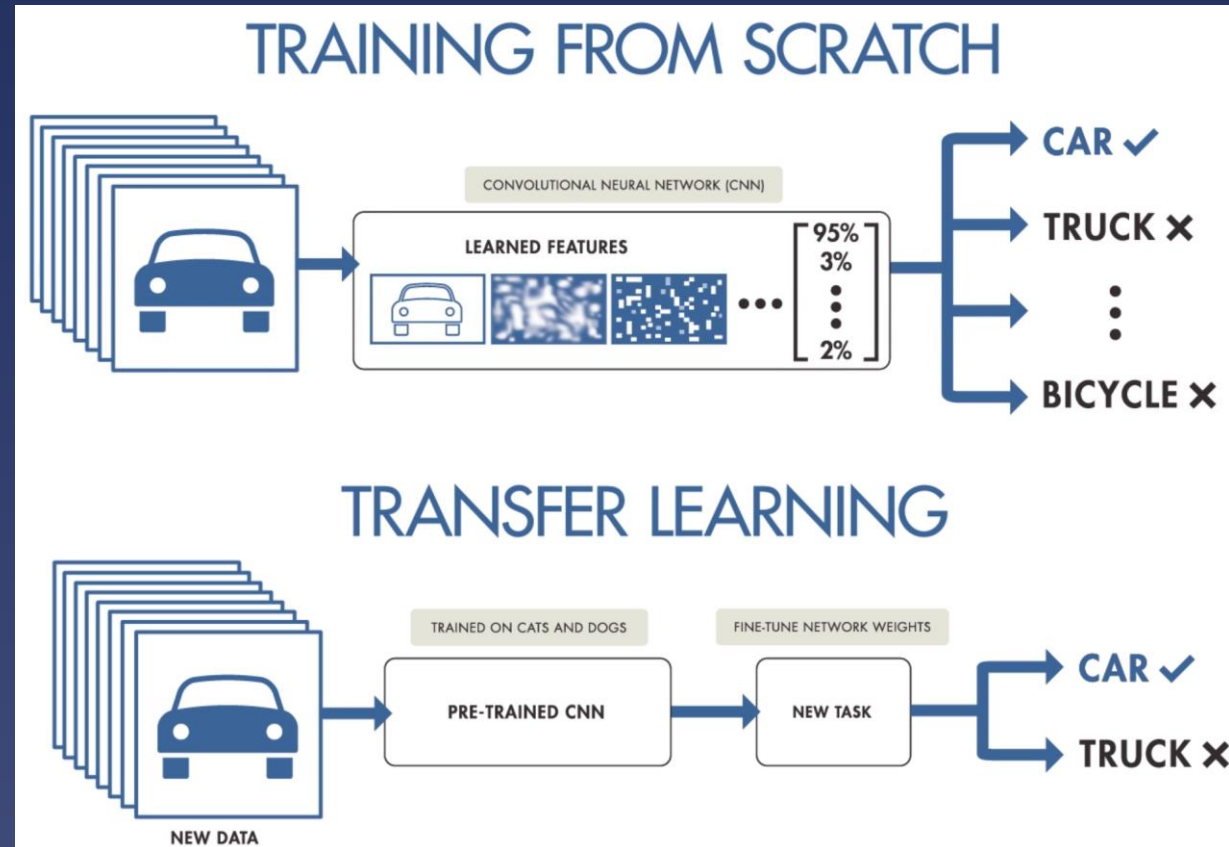

Runs on Windows, macOS and Linux and developed in the open on GitHub

Cloud Architecture

Demo

1. Create a Azure Function App
2. Save MobileNetV2 model to Azure Storage Blob
3. Create ClassifyImage API
4. Load model in Azure Function
5. Make Prediction
6. Test through Postman – Locally
7. Deploy to Azure Functions on Cloud.
