ML.Net

Machine Learning framework made for .NET developers

Build-yourown

Build your own custom models by writing C# or F# code

Developer focused

ML.NET provides just the right amount of productivity and control

Extensible

Tap into other machine learning toolkits with the rich extensibility model like TensorFlow

Proven

MLNET has been used internally in products like Office and Bing for years

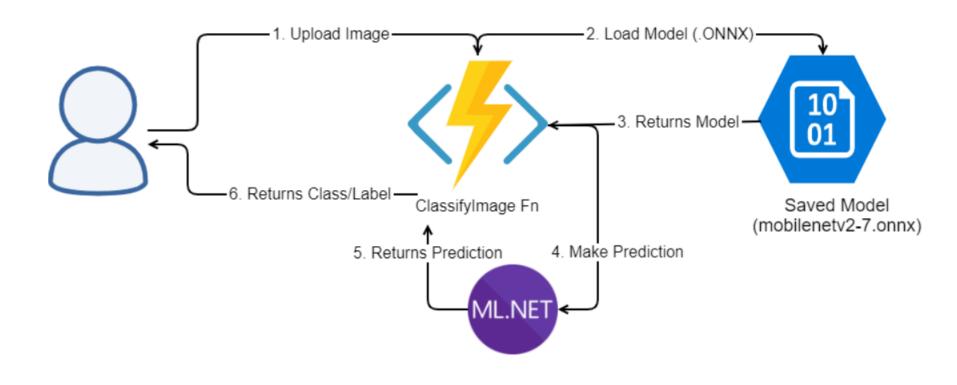

Open source and Crossplatform

Runs on Windows, macOS and Linux and developed in the open on GitHub
